About Me

Since 2021, I am a backend-oriented professional software developer who has worked in various projects in the software industry. So far I have developed high performance and scalable systems.

I have experience in front-end development, but I see that back-end development is closer to my skills and interests. I have in-depth knowledge of Microsoft technologies, especially .NET Core/.Net Framework, Asp.Net Core MVC and MS SQL Server. I prioritise software architecture, code readability and maintainability to ensure the long-term success and scalability of the projects I work on. I have good problem solving skills and am willing to continuously improve myself, learn and implement new technologies.

Education

- Beykent University / Computer Engineering(**10/2018 - 09/2022**)
Mezuniyet notu : 3.19
- Maçka Akif Tunçel Anatolian Technical High School / Web Programming
(**09/2013 - 06/2017**)

Foreign Language : English – Intermediate (B1)

Work Experience

Back-End Developer - Getron Information Services (04/2024 - Continued)

- I worked on B2B Windows forms and API projects developed with .Net Framework.
- I developed the new version of the old API project with .NET Core and Dapper.
- I managed the research and documentation processes of new integrations and ensured that the team implemented them after finding the most appropriate method.

Technologies Used: .NET Framework, Win Forms, Petapoco, T-SQL, Azure Storage Services, Quartz

Back-End Developer - BestERA Software and Consultancy (14/04/2023 - Continued)

- I worked in B2B ERP projects with .NET infrastructure.
- I developed an application from scratch for a customer with .NET Core.
- I wrote new services in a microservice project developed with Ocelot.
- I provided performance by using SQL features such as stored procedure and view in related areas.
- I did refactoring in codes that increase resource usage and do not comply with SOLID principles.
- I wrote Unit Test for new functions.

Technologies Used: .NET Core/Framework, GraphQL, Ocelot, Entity Framework, T-SQL, Quartz, JavaScript

Full-Stack Developer – Freelance (10/09/2023 – 10/11/2023)

- In the B2C MVC project developed with .Net Core, I developed an environment where data entry is made through the admin panel and services where the relevant data is processed and presented to the end user.

Technologies Used: Asp.Net MVC, Rest, Entity Framework, SQL Server, Javascript, JQuery, Bootstrap, HTML, Css, Git, Sourcetree

Full-Stack Developer - Ludens Advanced Financial Services (07/2021 - 04/2023)

- I worked in the B2C MVC project developed with .Net Core.
- I worked in B2B API project developed with .Net Framework.
- I worked on background services that run on the server in a timed manner.
- I designed and implemented responsive interfaces for the B2C project.
- I developed and added a flexible survey module to the B2C project.
- I made API connections of systems such as e-invoice, payment system, Youtube.

Technologies Used: .NET Core/Framework, MVC, Web API, Entity Framework, Ado.NET, T-SQL, Serilog, Hangfire, Html, Css, Javascript

Technologies I Use

.NET Core / .NET Framework / Asp.NET Core MVC / Windows Forms / Entity Framework / LINQ / Web API / Ado.Net / GraphQL / MSSQL Server / T-SQL / Redis / Ocelot / RabbitMQ / JavaScript / JQuery / HTML / CSS / Bootstrap

Projects

Fund Analysis Platform (07/2021 - 04/2023)

Developed with .NET Core MVC, I started the development of the web application, which contains the analysis, recommendations and detailed information of investment funds, from near zero and put it on the air. With continuous updates, I made a great contribution to closing the gaps of the system and reaching a wide audience.

Technologies Used: .NET Core/Framework, MVC, Web API, Entity Framework, Ado.NET, T-SQL, Serilog, Hangfire, Html, Css, Javascript

Car Rental Project (17/03/2021 – 20/05/2021)

I simulated an environment where users can rent a car through the system in a layered architecture on the .Net Core API

Technologies Used: .Net Core, Entity Framework, N-Tier Architecture, OOP, AOP, Autofac, Fluent Validation, Sql Server

Interests

In my spare time, I like to research computer hardware, help in forums, and follow technological developments.

I follow investment instruments, economic situations, and I like to improve my financial literacy.
